ALL IN ONE CLEANING CONCEPT

The **Toucan Pack** is an all-in-one mobile station, which stores, distributes and recycles its Fibercan+[®]. It enables professionals to deal **efficiently** with spillage problems within the workshops **while saving money**.

PROBLEMS WITH TRADITIONAL ABSORBENTS

Traditional absorbents (sawdust and granules bags) are being used in **high quantities** within workshops to deal with spillages. Operators need to make **many manipulations** for a **disappointing result** (slippery floor).

This causes **high quantities of waste** and expensive disposal costs.

THE ABSORBENT RECYCLING SYSTEM

Mobile and ergonomic, the **Toucan Pack** stores and distributes its Fibercan+® absorbent to deal quickly with spillages. Efficient, Fibercan+® **absorbs instantly** all types of liquids, without leaving any greasy film. Everything goes back into the sifting system of the Toucan Pack. By pushing the handle, the operator is able to **separate the dirty absorbent from the reusable one** which goes back into the collection tray available for the next spillages.

Toucan Pack®

THE ABSORBENT RECYCLING PACK

The sifting system separates the soiled absorbent from the reusable one.

LIQ-LOCK® Absorbent Technology

Encapsulates liquids on contact

Fibercan+ ABSORBENT REFILL

Natural formula based on ligno-cellulosic fibers which instantly encapsulates liquids from the contact point.

Thanks to its micro-alveoli structure, the Fibercan+ encapsulates liquids to separate them from the reusable absorbent thanks to the sifting system.

TOUCAN PACK ADVANTAGES

1

Efficient

No greasy film, safe and dry floors -
Instant absorption

2

Ergonomic

All-in-one, mobile, reachable tools,
several storage spaces

3

Economical

Divides by 8 absorbent
consumption and waste

**Traditional
absorbents**

**Fibercan+
absorbent**

Consumption

Wastes

Retreatment

8x more savings

8x

8 times more
efficient

Environment-friendly

Instant
absorption

Reusable till
saturation

DESIGNED BY AND FOR THE USERS

FOR CLEAN AND ORGANISED WORKSHOPS

Easy to reach collection tray

> Eases the access to the absorbent

Ergonomic sifting system

> Sifting by vibration

Eased maintenance

> The sifter emptying process is achieved by tipping into a waste retention box

All reachable tools

> Shovel and broom with their supports, storage spaces dedicated to cleaning products

Stores and distributes

Absorbs & recycles

Collects waste

Technical characteristics

Dimensions of the station	1119 x 796 x 651 mm (closed lid)
Weight without option	24 kg
Material	MDPE
Storage tank volume	45 litres
Storage space for the consumables	2 cans/sprays + 1 aerosol can compartment
